

# ETHICAL DECISION MAKING AND RESPONSIBLE AI

*Responsible AI use is not just a compliance issue – it is a leadership imperative.*

---

As AI becomes embedded in everyday workplace decisions, leaders are increasingly responsible for ensuring that its use is fair, transparent, and aligned with organizational values. The stakes are real: bias, privacy risks, and lack of accountability can create serious legal, ethical, and reputational consequences.

This program equips participants with practical ethical frameworks to navigate complex AI-related decisions. Participants will leave with the tools and confidence to communicate clearly about AI and to protect both their people and their organizations.

## **Participants will walk away with these skills:**

- Applying practical ethical frameworks to workplace situations where AI intersects with people, processes, and decision-making
- Recognizing and addressing bias in AI tools by learning how to spot risks
- Communicating transparently about AI use so employees and stakeholders understand when AI is used, its limitations, and how outputs are validated

## **Audience:**

Professionals in a manager role, individual contributors, or leaders of any kind.

## **Duration:**

This program consists of one half-day, in-person session.

**Cost: \$400 General Registration**

**Select Discounts Available**

**0.3 CEUs will be issued for this program**
